GOING FROM POINT “A” TO POINT “B” CAN BE VERY EXPENSIVE TRIP — IF YOU HAVEN’T DISCOVERED **PORTA-VEYORS**

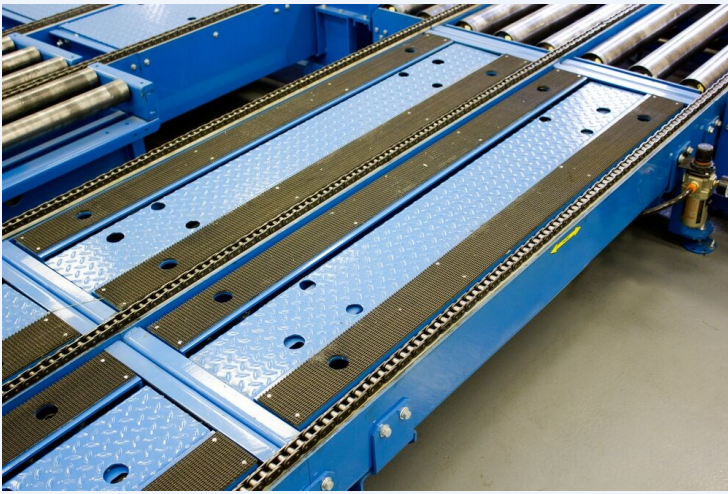

Soaring labor costs have minimized dollar effectiveness. **PORTA-VEYORS** provides the means to utilizing your employees where they are most benefit to you. **PORTA-VEYORS** can move up to 750 lbs. per 75 ft unit. It's aluminum construction (each sections weighs only 55 lbs.) makes for easy set-up in any location for any purposes.

Growers need to move their plants to and from the fields. The power-take-off option for the Porta-Veyor is ideal, as the same tractor that hauls the load can also power the conveyor that sets up the load. With up to a 125 ft length, the Porta-Veyor can easily reach into the middle of most fields, and the 20% slope capability lets you easily adapt to the terrain of the field and road.

80 YEARS OF SERVICE TO A GROWING WORLD

Our customized portable conveyors on a greenhouse, nurseries or garden centers can be moved on rails to the location needed, where it is used to move flats of plants.

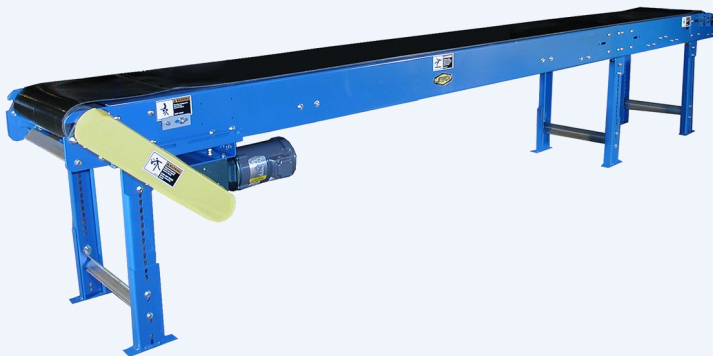

Load and unload your truck, trailers, and containers with a minimum of people and effort. With a maximum length of 125 ft the Porta-Veyor can reach from your loading/unloading area to the furthest end of the truck, trailer, or container. The Porta-Veyor can handle a 20% up- or down-slope, so it is easy to adjust for the relative heights of both dock and vehicle.

What Can a Porta-Veyor Do For You?

The Porta-Veyor is a portable, labor-saving device, and this translates to cost savings for you:

Save money labor and labor-related costs (taxes, insurance, health, etc.).

Use less people to accomplish your task, with fewer health and safety risks.

Achieve higher throughput (product moved per unit time) than with manual labor approaches.

Because it is portable, the Porta-Veyor can be used where you need. Power it from an electric supply, from a portable generator, or use power-take-off from your tractor or other PTO-equipped vehicle.

One portable unit can be shared among multiple job locations.

The up-slope and down-slope capability provides a portable lift capability anywhere, anytime.

Drive Specifications

Single drive motor at one end for up to 100 feet (30.5 m) of conveyor

Power take off drive unit available

100 VAC or 220 VAC motors

Electric power from electric circuit or portable generator

Reversible
