Sensaphone

Whether you're onsite or off, Sensaphone keeps you aware. Sensaphone, a highly respected producer of alarm and monitoring systems offers three ways to keep crops safe.

Sensaphone 1800 Phone Line

- Land line communication
- 24/7 monitoring
- Simple, convenient, cost-effective remote monitoring for greenhouses
- Receive voice alerts and alarm notifications over standard phone lines
- Notifies up to 8 people
- Up to 8 external sensors (not included) monitor temperature, humidity, water and more
- Included relay output can switch local devices on and off based on alarm
- Record custom alerts and alarm messages in your own voice
- Plug in power supply monitors for power failure
- Internal battery backup for 24 hours
- Nonvolatile memory retains system settings, programming and logs if power fails
- Call in by phone for status of each monitored condition
- Keypad and speaker for local programming
- Password protected
- No monthly charge

SPECIF/CATIONS

- Phone Line, plug in power supply with internal battery backup
- Dimensions: 8.0 x 12.3 x 5.6"
- NEMA-4X clear door enclosure
- Part# M-5801

Sentinel Monitoring System with Cellular Modem

- Cellular communication
- Cloud-based monitoring ... without network connections
- Supervised internet connection assures the Sentinel is online and monitoring at all times
- Store sensor readings in "the cloud" automatically protects against data loss and provides limitless information storage
- Receive alarm notifications through cellular connection
- Notifies an unlimited number of people by e-mail, text message or voice phone calls in the event of an alarm
- Up to twelve external sensors (not included) monitor temperature, humidity, water and more
- A cellular modem provides operation in locations where an ethernet connection is unobtainable. Available with a 4G/LTE modem
- Manage multiple units, make programming changes and access status conditions using a simple, powerful web-based interface
- Included external antenna allows Sentinel to be placed in areas where it may not otherwise get cellular coverage, such as inside a building or steel box
- Subscription costs ($24.95 per month) includes all online hosting, cellular connection fees and unlimited text, phone and email alerts
- Cellular modem and Sim card included
- 8-hour rechargeable battery for Sentinel & cellular modem included
- Unlimited samples securely stored on Sentinel servers, programmable sampling interval 1 minute to 24 hrs.

SPECIF/CATIONS

- Power requirement: 12-24 DC comes with 12VDC plug-in power supply
- Dimensions: 12.5 x 12.2 x 7.0" NEMA-4x rated enclosure
- Output Relay - one low voltage NO/NC relay output Manual or automatic alarm switching
- Input Types - Contact 2.8K, 1OK, 4-20mA
- Verizon - Part# M-5803
- AT&T - Part# M-5804
- Rogers (Canada) - Part# M-5805

Sentinel Monitoring System Ethernet

- Ethernet communication
- Supervised internet connection assures Sentinel is online and monitoring at all times
- Manage multiple units, make programming changes and access status conditions with simple, powerful web-based interface
- Store sensor readings in "the cloud", protects against data loss and provides limitless information storage
- Unlimited number of emails, text or phone calls for alarm notifications
- 12 external sensors (not included) monitor temperature, humidity, water and more
- Plug in power supply also monitors for power failures
- 8- hour rechargeable battery backup included
- One low voltage NO/NC relay output, manual or automatic alarm switching
- Free or paid monthly ethernet subscription options. Paid is $6.00

SPECIF/CATIONS

- Enclosure 9.5 x 11.1 x 3.5" NEMA-4X rated
- Standard U.S. style plug for use on 120v/60hz power
- Part# M-5802, 5803, 5804
